

POWERPLASTICS

**FLEXIBLE INTERMEDIATE
BULK CONTAINER**

Used primarily for the transportation and storage of dry aggregates such as sand, stone, rubble removal and planting medium into building sites. The aggregate once placed in the bag is able to be moved onto site in a safe, cost effective and clean manner.

BENEFITS

- A safe, quick, clean method to transport and store aggregate
- Reduce loading and unloading times, saving labour costs and material losses in transportation and storage
- Avoids wastage of material due to product retention
- Avoids many throw away bags as the bags have multiple uses
- Return freight costs are minimal as the units are neatly stackable
- Easily carried by means of forklift, cranes, pulleys, conveying belts and hydraulic wagons
- Storage allows 3 layers without risk of tumbling
- Safety certification in place
